- **Wi-Fi Module**

After opening the Air Conditioner Front panel, Wi-Fi Module will be available on the electrical box cover or on the panel. The Wi-Fi Module will have a unique serial number. It is very important for after sales support. Don't tamper or remove the sticker.

### Prerequisite:-

Before using Havells Sync, please complete the following configuration in order to exchange the credential between air conditioner and smart phone.

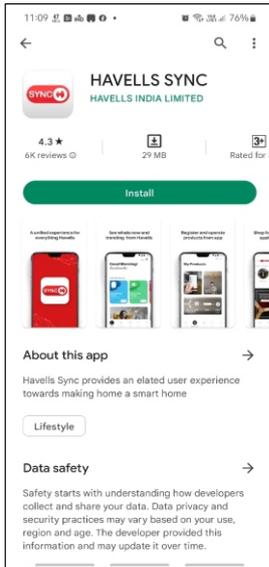

- Connect your smart phone with the Wi-Fi Network by selecting the same Wi-Fi Network with which the Air Conditioner has to be connected.
- For dual band Wi-Fi Router, select 2.4 GHz band and secured it with a Password. Read the router user manual or contact your network support for router setting.
- Router Name/WIFI name/ SSID should not be more than 15 characters.

**Note:** Display content or the position may be different from the above graphics. Please refer to the actual APP screen. Asterisk \* marked functions are optional and available in selected models only. The company reserves the right to change/modify in the content. The steps and process may differ. Please follow to the APP's actual screen.

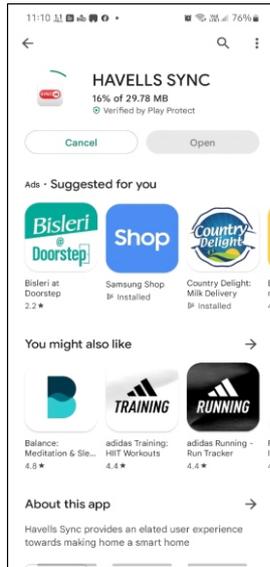

- In firewall enabled network (like in office network), the IP and the device must be allowed, contact to your IT support team.
- It is required to turn the GPS and Bluetooth in ON state in your Smart Phone.
- It is required to allow all necessary Permissions to Havells SYNC App.
