OPERATION OF WIRELESS REMOTE HANDSET

The wireless remote handset is a versatile and user-friendly device that allows users to control the air conditioning system's cooling, *heating, and other functions. It's simple to understand and easy to use thanks to the LCD display with *LCD backlighting and night glow buttons.

FACTORY RESET

Remote handset can be reset to factory setting by putting batteries back again after removing the battery from the handset for some time. Remote handset with *RESET button can be done by pressing RESET button continuously for more than 10 seconds.

After reset all icons on remote handset LCD will turn ON for 3 seconds.

DEFAULT SETTINGS

By default, remote handset will be set to COOL mode, 24 °C set temperature, Display/Light function ON, Auto Fan Speed in Standby/OFF state. *Backlight will also turn ON for some time.

*Note: In COOL, DRY and AUTO mode (Cooling modes), if the unit is turned OFF and turned ON using remote handset, default 24 °C will be automatically selected and corresponding function will be transmitted from the remote handset after turning ON. *In COOL mode if previous set temperature is between 16 °C to 23 °C, after turning OFF using remote handset, set temperature will be set to default 24 °C when unit is turned on using remote handset.*

If previously set temperature is equal to above 24 °C, after turning OFF using remote handset, set temperature will remain unchanged when unit is turned on using remote handset (except in DRY mode).

This will be applicable to all the product manufactured after Jan-2020 as per regulation.

*Display content or the position may be different from the above graphics, please refer to actual product. Asterisk * marked function are optional and available in selected models only.*
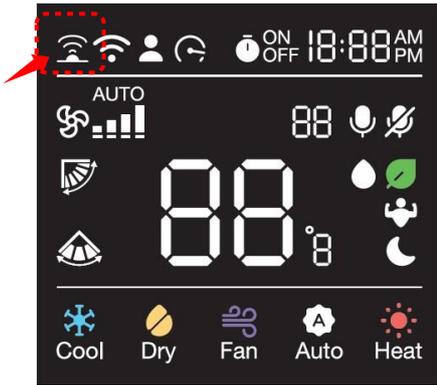

IR TRANSMISSION INDICATOR

Whenever signal is sent through remote handset 📡 icon will be displayed on remote handset.

POWER ON/OFF BUTTON

Press POWER ⏻ button to turn the air conditioner ON or OFF.

RTC SETTING

Insert battery and remote will go in RTC setting mode.

- o In RTC setting mode:-
- ○ Clock icon with default time 10:10 AM in blinking continuously.
- ○ Single Press Plus (+)/ Minus (-) button will change the minute by 1-minute. o Long Press Plus (+)/ Minus (-) button will change the minute by 10-minutes
- ○ Press + button to Increase and press – button to decrease.
- ○ To set and save setting for RTC, press **Timer or Timer ON button.** Selected time will be set in the RTC. ○ When RTC is set, Remote will go into **Default OFF State**.
- ○ RTC Data should be sent to receiver every time when ever any button is pressed.

Display content or the position may be different from the above graphics, please refer to actual product. Asterisk * marked function are optional and available in selected models only.
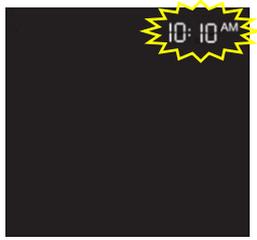

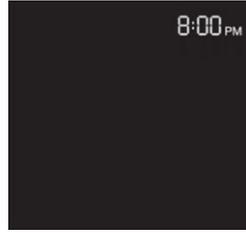

RTC Setting Mode	RTC Set	Default OFF State

POWER ON STATE

During Power ON state, the two partition lines will illuminate on remote handset display. In this state you can use all function and features for remote handset. Power icon on Indoor display will glow.
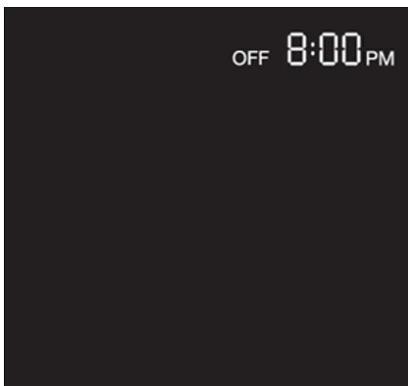

POWER OFF/STANDBY STATE

During Power OFF/Standby state, the two partition lines will disappear from the remote handset display. In this state you can set ON/OFF Timer, DISPLAY, and WI-FI and RTC timing will be visible.

Power icon on Indoor display will glow.

MODE

Use MODE 69 button to select one of the available modes. The selected mode will be displayed on the remote handset and the appropriate indication will illuminate on remote handset display.

Display content or the position may be different from the above graphics, please refer to actual product. Asterisk * marked function are optional and available in selected models only.

Each time when you press the Mode button, operating mode will change in cyclic order from COOL, DRY, FAN, AUTO & Heat.

COOL → DRY → FAN → AUTO → HEAT

AUTO

Use Auto mode to perform the comfortable cooling and heating automatically. When the difference between the room temperature and the set temperature decreases, the air conditioner controls the fan speed and compressor speed automatically.

⏻ ▶ 69 ▶ Select AUTO Ⓐ

*Display content or the position may be different from the above graphics, please refer to actual product. Asterisk * marked function are optional and available in selected models only.*

COOL

In Cool mode, the air conditioner will cool your room as per your preference selected using remote handset. You can adjust the set temperature, fan speed, swing angles, etc. System varies compressor speed to maintain the desire temperature. Setting temperature range is 16 °C to 30 °C from the wireless remote handset. By default, set temperature is 24 °C after replacing the batteries.

If the outdoor temperature is much higher than the indoor set temperature, it may take time to bring the indoor temperature to the desired level.

⏻ ▸ 69 ▸ Select COOL ❄
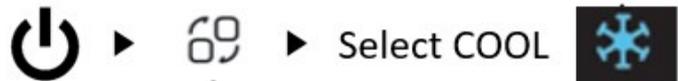

*DRY

In this mode air conditioner acts like a dehumidifier and remove moisture from indoor air. Dry mode makes the air feel refreshing in a humid climate.

⏻ ▸ 69 ▸ Select DRY 💧
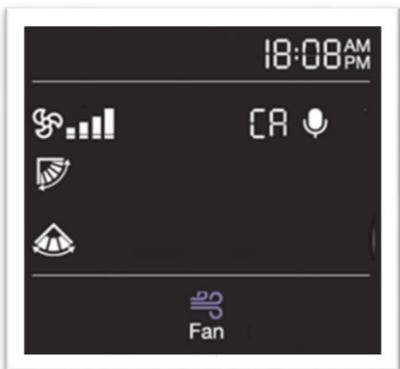

FAN

Fan mode can be selected to circulate air in your room. Fan mode will be helpful to refresh the stale air in your room.

⏻ ▸ 69 ▸ Select FAN 🌬

Display content or the position may be different from the above graphics, please refer to actual product. Asterisk * marked function are optional and available in selected models only.

⚠

8
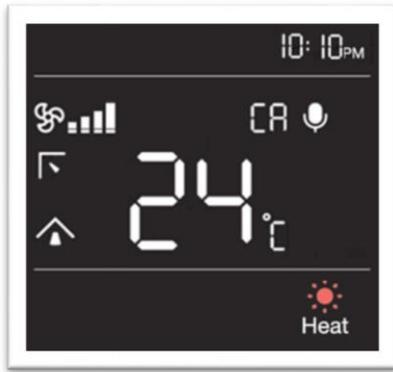

*HEAT

In Heat-Cool air conditioner you can warm your room using heat mode.

• Fan may not operate, and Flap will set to default for some time in the beginning to prevent cold breeze.

Since the air conditioner heats the room by taking heat energy from outdoor air, the heating capacity may decrease when outdoor temperature is extremely low.

• Use an additional heating appliance in combination with the air conditioner if you feel the air conditioner heats insufficiently.

⏻ ▶ 69 ▶ Select HEAT

📄

Note: Heat mode is an optional feature and work in selected models only.
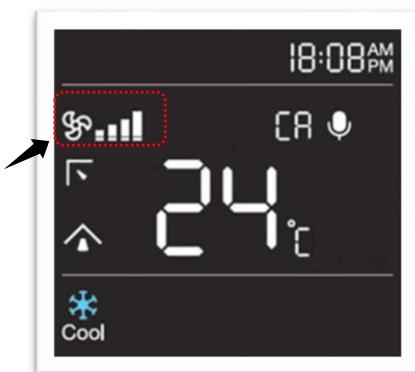

FAN

Press the fan button to select desire fan speed. The selected fan speed will be displayed on the remote handset and the appropriate indication will illuminate on remote handset display.

⏻ ▶ (Fan) ▶ Select SPEED

Display content or the position may be different from the above graphics, please refer to actual product. Asterisk * marked function are optional and available in selected models only.

⚠

Each time you press the FAN button, FAN SPEED will change as per below cyclic order [*Depends on the Type of Remote]. Use fan key to increase or decrease the fan speed. Silent fan speed can be selected directly from fan key .

Fan button selection in different modes and function.

AUTO/HUMIDIT/ ECO	AUTO				
DRY	LOW				
FAN	SILENT	LOW	MED	HIGH
